

EurBee 11 – 11th European Conference of Apidology

Bologna, 7-10 September 2026

website: <https://www.eurbee2026.com>

Bologna, 28 August 2026

Subject: **EurBee 11 – Final programme and Book of Abstracts now online**

Dear Colleagues,

with the Conference approaching, we are pleased to inform you that the **programme sections of the EurBee 11 website have been updated to their final version.**

The **Programme at a glance** (<https://www.eurbee2026.com/programme-at-a-glance-2/>) gives the overall shape of the four days: keynote lectures, the twenty symposium sessions across the four rooms, breaks, poster sessions and social events. The **Scientific programme** (<https://www.eurbee2026.com/scientific-programme/>) lists every contribution in full, with session coordinators, presenting authors, titles and the reference codes used in the Book of Abstracts — OC for oral communications, P for posters.

The **final version of the Book of Abstracts** can be downloaded from the Scientific programme page, either through the link or by scanning the QR code shown there. If you downloaded the Book of Abstracts before this update, **we would kindly ask you to delete that outdated file and replace it with the current one**, as the earlier version contained a number of errors and omissions that have since been corrected.

Please, enquire with eurbee2026@edagricole.it should anything require our attention.

We look forward to welcoming you to Bologna from 7 to 10 September.

With kind regards,

Antonio Nanetti

President of EurBee 11

On behalf of the Local Organising Committee
